Multi-Purpose Restorative Appliance

## WHY Snap-On Smile

No shots. No drilling. No adhesives. You can even eat while wearing the Snap-On Smile® appliance. Patients looking for a non-invasive, reversible, affordable approach to restorative and cosmetic dentistry are excellent candidates for Snap-On Smile. It's an easy, quick and affordable solution for patients who want to feel better, look better, and function better. Patients using Snap-On Smile report an immediate boost to confidence and self esteem. Most are impressed with the natural look and feel of Snap-On Smile and are grateful for the brief time investment - about two weeks - to achieve such life changing results.

This revolutionary appliance is the ideal solution for solving a wide variety of short- and long-term clinical challenges, as it serves as both a non-invasive restorative option as well as a diagnostic appliance. Applications include using Snap-On Smile as aesthetic provisionals for implant restorations, as a vehicle for increasing facial height (vertical dimension), as cosmetic removable partial dentures, and even as a long-term smile enhancement. Snap-On Smile can last for years and yet is affordable enough to be temporary. It has also proven to be a terrific incentive for patients who are in need of but are hesitant to commit to more involved restorative treatment. In fact, our research has shown that 40 percent of patients who started treatment with the Snap-On Smile transitioned into more extensive restorative dentistry.

## Cosmetic Removable Partial Denture

## Cosmetic Smile Enhancement

## Implant Temporary Restoration

## Raising Vertical Dimension
